PROJECT ABSTRACT

simpleTech

A system for managing salon. This system keeps track of customer, employee, along with the payment for the services. This is a fully equipped system that alone manages the entire function of a salon.

The system works as follows:

Admin

- Administrator may login to the system
- Manage employee and customer details
- View and edit leave status of the employee
- provide offers on packages
- view billings and payments

- Keeping employee attendance and salary details

- View customer feedback

Employee

- Employee can login
- Update his/her account
- Apply leave
- View customer and various packages used by them

- Handle online billing

Customer

- View new packages
- book counters and cancel requests
- Online payment
- Rate employee services
- Profile management
